## Owner Consent for CPR or DNR

Client Name: \_\_\_\_\_

Patient Name: \_\_\_\_\_

Should an emergency occur while your pet is under the care of SVOC, we must know your wishes for resuscitation so we can take appropriate measures to care for your pet. We place means of resuscitation into three levels; a do not resuscitate order (DNR) means we will not intervene with the natural course of death, in comparison to a Level 2 CPR, in which we will take all means necessary to preserve an animal's life. The Sirius Veterinary Orthopedic Center professionals understand the bond you have with your pet and wish to do our very best to care for your pet in your absence while hospitalized. We know that a decision of this magnitude is very difficult, but for medical reasons, we must have you, as the owner, choose.

I, \_\_\_\_\_, as owner or agent for owner have reviewed the aforementioned information, and understand the terms of care. I therefore choose the following level of CPR:

- **Do Not Resuscitate (DNR)**
  
- **Level 1 CPR (Estimate \$250-\$350, does NOT include cost to transfer patient to a 24 hour care facility):** External chest compressions, endotracheal tube placement, manual ventilation, IV catheter placement, vital sign monitoring, reversal of all anesthetic medications given, administration of drugs to improve heart rate and circulation. Transfer to a 24 hour facility for care.
  
- **Level 2 CPR (Estimate \$700-\$1500, does NOT include cost to transfer patient to a 24 hour care facility):** Cannot be performed on small breeds Level 1 CPR actions moving into (Sterile surgical Procedure) Incision into chest cavity, direct compression of the heart, endotracheal tube placement, manual ventilation, IV catheter placement, vital sign monitoring, reversal of all anesthetic drugs given, administration of drugs to improve heart rate and circulation. Transfer to a 24 hour facility for care.
